No. 19727.

DUBLIN CASTLE,

15th October, 1909.

SIR,

I have to acknowledge the receipt of your letter of the 14th instant, forwarding for submission to His Excellency the Lord Lieutenant, the Report of the Congested Districts Board for the year ended the 31st March, 1909.

I am,

Sir,

Your obedient Servant,

(Signed) E. O'FARRELL.

The Secretary,
Congested Districts Board,
Dublin.

CONGESTED DISTRICTS BOARD FOR IRELAND.

TO HIS EXCELLENCY JOHN CAMPBELL,
EARL OF ABERDEEN,
&c., &c., &c.,

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

MAY IT PLEASE YOUR EXCELLENCY,

We, the members of the Congested Districts Board for Ireland, beg leave to submit this Report of our proceedings during the financial year ended 31st March, 1909.

MONEYS FOR THE PURPOSES OF THE BOARD.

Our available funds in the past year amounted to £209,619 derived from the following sources:—

Income and
Expenditure.

(a) Fixed Income.

	£
Interest on Church Surplus Grant,	41,230
Parliamentary Grant,	25,000
Ireland Development Grant,	20,000
Total,	<u>£86,230</u>

(b) Fluctuating.

	£
Repayment of Loans,	11,247
Interest on Stock, &c.,	180
Rents and repayments under various heads,	95,086
Cash from Land Commission on re-sale of estates,	22,838
Loans by Board of Works for improvement of estates and other purposes,	45,900
Total Receipts,	<u>£261,501</u>
Balance from last year,	<u>8,118</u>
Grand Total,	<u>£269,619</u>

The total expenditure as detailed in the Appendices to this Report was £242,007, which left a balance of £27,612 at the end of the year, including a balance of £5,161 to credit of the two Fishery Funds. The sum of £649 12s. 3d. in Guaranteed Land Stock was also available for general purposes, in addition to £5,000 Stock to credit of the Fishery Funds. A Table given at p. 43 shows, for each year since the formation of our Board, the gross receipts and expenditure, including all moneys which passed through our hands for the purchase of estates.

Advances
for Pur-
chase of
Estates.

The advances which, during the past year, have been made under the 72nd Section of the Act of 1908 for the purchase of estates, and for the redemption of charges on estates, are as follows:—

	£
R. C. Walsh,	1,000
A. Rashleigh,	8,581
J. Burns-Hartopp,	30,873
H. Loughheed,	650
Earl of Cork,	500
H. J. Baker,	1,650
E. Armitage and others,	6,440
J. Fitzgibbon,	4,250
E. J. Madden,	1,100
B. F. McDonnell,	2,150
J. R. K. Tredennick,	15,850
Lady Wilbraham,	2,500
R. A. Knox,	11,317
Dr. M. E. Kenny,	22,945
O'Connor Don,	10,493
A. F. Browne,	735
M. J. Balfe (II.),	12,300
M. T. Furlonge,	6,400
	<u>£139,637</u>

[For further particulars of these estates, see Appendix XXXII.]

Total
Advances
under Act
of 1896.

The entire amount of Guaranteed Land Stock (£502,797 16s. 2d.) issued to us for the purchase of estates prior to the passing of the Act of 1903, and for the redemption of charges upon these estates, in the several counties, has been cancelled by the sale of holdings to the tenants. A statement given in Appendix No. XXVIII. shows the manner in which the proceeds of the re-sale of these estates were brought to account, viz.: £818,613 was paid to the Board by the Land Commission; £197,440 was applied by the Land Commission to the cancellation of part of the stock issued for purchase of the estates, the remainder of this stock, £280,692, being redeemed by the Board out of the cash paid to them as above stated. £7,789 was received by the Board direct from purchasing tenants, £14,819 had not yet been transferred to the Board on 31st March last, and £27,010 was the value of the holdings then remaining unsold.

Total
Advances
under Act
of 1903.

The amount advanced in cash by the Land Commission under the Irish Land Act, 1903, sec. 72 and 77, for the purchase for us of estates in the several counties and the amounts written off our debt for these advances by the sale of holdings to the tenants were, on 31st March last, as follows:—

Counties.	Total Advances to 31st March, 1903.	Amount written off.	Balance due to Land Commission.
	£ s. d.	£ s. d.	£ s. d.
Donegal,	15,545 17 6	1,019 7 5	15,597 10 0
Sligo,	94,271 0 0	48,978 0 0	45,293 0 0
Mayo,	478,594 6 0	64,346 19 0	414,247 7 0
Roscommon,	385,408 18 4	12,471 15 4	372,936 0 0
Galway,	175 611 0 0	85,194 0 0	88,417 0 0
Kerry,	135,950 0 0	18,426 18 9	118,523 1 3
Cork,	19,495 0 0	—	19,495 0 0
Total	1,304,974 16 10	230,416 18 7	1,074,557 18 3

In addition to the above sum of £230,416 18s. 7d., written off by re-sales, tenants had at 31st March last signed purchase-agreements for £180,481, which will be written off when advanced by the Land Commission.

OPERATIONS DURING THE YEAR, 1908-1909.

Our operations fall under the following heads:—

- I. Improvement and enlargement of holdings and Migration.
- II. Sea Fisheries;
- III. Industries;
- IV. Engineering Works and Parish Committees;
- V. Miscellaneous.

The following is a statement of the purchases made in each year since the passing of the Irish Land Act of 1903.*

Purchase of
Estates.

Year.	No. of Estates.	Purchase Price.		
		Tenanted.	Untenanted.	Total.
		£	£	£
1903-4, ...	13	118,298	63,184	181,477
1904-5, ...	51	500,335	159,865	660,200
1905-6, ...	37	238,204	110,113	348,317
1906-7, ...	17	69,531	40,832	110,363
1907-8, ...	22	61,546	71,090	132,635
1908-9, ...	16	182,427	75,086	257,513
Totals, ...	156	1,170,836	520,170	1,690,506

The Estates purchased since 3rd October 1903, the date of our last Report, were as follows:—

Estate.	County.	Area.		Price.
		Tenanted.	Untenanted.	
		Acres.	Acres.	£
Mogumna Farm, } Murray-Stewart	Donegal	—	22	548
Mrs. M. Powell ...	Sligo	749	292	8,065

Major L. Leonard ...	"	3	180	1,597
J. P. Mulligan ...	Galway	—	530	5,000
Totals,		22,810	3,772	£221,656

*NOTE.—Since the issue of our last Report the amount of purchase-money of several estates has been altered, owing to the area of land actually conveyed differing from that at first agreed upon. The purchase of arrears of rent has also caused adjustments in some cases.

Purchase of
Estates.

We have much pleasure in reporting the purchase of the estate of Sir Henry Lynch-Blosse, consisting of 18,566 acres, lying in sections between Castlebar, Ballinrobe, and Claremorris. There are 560 tenants, the majority of whom have fair holdings, but 287 pay rents not exceeding £5. We have taken steps to acquire the holdings of 22 yearly tenants occupying 3,412 acres, and paying £2,232 rent.

We have decided, as soon as our financial position has been improved by the grant of further funds for the improvement of estates, to make an offer for the purchase of the large estate of Lord Ventry in West Kerry, and we have already had an inspection and valuation of the estate made.

In October, 1905, when issuing our fourteenth Annual Report, we drew attention to the need of further funds for our migration operations, and we have reason to hope that the appointment, on 20th July, 1906, of the Royal Commission to inquire into the operation of the Acts dealing with congestion will result in a substantial improvement in the financial position of our Board, but it has unfortunately had the effect of leaving us nearly four years without any increase of our funds. The decline in the amount of our purchases since the 31st March, 1906, shown by the statement given above, has been due to the want of money for the development and preparation of estates for re-sale, not to the want of funds for purchase.

In compliance with the strongly expressed wish of the Lords Commissioners of the Treasury we decided in April, 1908, that, with the exception of a few urgent cases in which negotiations had been commenced, we would purchase no more tenanted estates until the future status and income of the Board have been settled by Parliament.*

Our outlay on the improvement of estates since the passing of the Act of 1903 has been as follows:—

Year.	Improvement Works On all Estates.	On Estates purchased under Act of 1903.
	£	£
1903-4	64,787	355
1904-5	70,898	3,850
1905-6	128,519	49,704
1906-7	78,516	65,006
1907-8	96,235	88,287
1908-9	54,855	44,855
	493,835	252,057

(For Details see Appendix XXXI.)

To enable us to make this large expenditure £145,000 was borrowed from the Commissioners of Public Works and a further sum of £25,000, part of a special loan of £50,000 arranged for by Government, was made available towards the end of the

*NOTE.—Returns showing the number of years' purchase paid for estates are contained in Appendixes XXXII—XXXIV.

past year, but too late to allow of the re-opening of all the works on estates which had been gradually reduced since the winter of 1907-8, when about 8,200 men had been employed, until August, 1908, when only 491 men remained at work, on small contract jobs which could not be discontinued.

Improvement
of Estates.

The works on which these men have been employed were, in accordance with our settled practice, of a kind which the tenants could not carry out for themselves on their individual holdings. All minor works, such as branch drains and accommodation roads for the benefit of single holdings, are constructed by the tenants themselves.

On the 18th November, 1908, we received £5,000 as an instalment of the new loan of £50,000, but did not obtain any further sum under that head until the 18th January, when £5,000 was received, and on the 1st March £15,000. This loan together with any money that may be available from our revenue during the current year, will enable us to resume, but on a smaller scale, the temporarily suspended operations for the building of houses for migrants, main and arterial drainage, and other works necessary for the preparation for sale of some of the estates in hands, but if our borrowing powers and financial position remain as at present during the current year, we shall be obliged to again practically suspend our land improvement operations before November next, as the money provided will be exhausted before that time.

The following is a statement of the amount of land in our hands on the 31st March last, and of the amount ready for sale:—

Re-sale of
Estates.

Remnants of estates purchased prior to Act of 1903 to be sold before 31st March, 1911,	£ 27,010
Remnants of these old estates, plantations, bog, and sporting lettings not proposed to be sold at present,	2,140
Estimated sale prices of 156 estates (1903 Act),	£1,787,232
Deduct Sales completed at 31st March, 1909,	412,396
	1,374,837
Remnants to remain on hands for some time longer, .	7,579
Total, .	£1,411,566

(For further details see Appendix XXXF.)

With regard to preparation for sale, the position at 31st March last was:—

Ready for sale, at 31st March, 1909, about	£ 262,694
In course of preparation for sale, a substantial portion being nearly ready for sale,	470,000
Estates on which little or no expenditure on improvement has been made, including estates, value £311,837, not yet vested in the Board,	678,872
Total, .	£1,411,566

During the year we sold holdings covering an area of 36,807 acres to 1,267 occupiers at prices amounting to £150,865. The sales would have far exceeded this sum if we had had funds to proceed with the necessary improvement works without interruption throughout the year.

A serious difficulty met with in connection with the inland fisheries is caused by a conflict between the interests of fishery owners and those of the tenants of neighbouring lands which are capable of improvement by drainage. It may be necessary in many cases for drainage purposes to deepen and clear the courses of streams or small rivers, and any interference with the river bed has been objected to as injurious to the fisheries. We have reason to believe that any injury of this kind would be only temporary, and that at small additional expense the fishing might be improved by the drainage operations. It would be generally advantageous if the Board were empowered to improve rivers and carry out drainage compulsorily.

Inland Fisheries.

We are glad to be able to report that up to the 31st March last no case had occurred in which the Land Commission had sold a holding purchased from us under the Land Purchase Acts, in consequence of the purchaser having failed to pay his instalments.

Repayment of Instalments.

No measures adopted by us have been productive of so much immediate improvement in the condition of the people as our various schemes for giving assistance, in building, enlarging or repairing houses, the aid offered having been generally availed of by the landholders in very extensive areas of the scheduled congested districts. Some thousands of houses which were unfit for human habitation owing to damp, cold, earthen floors and fixed windows, or owing to a portion of the dwelling being occupied by cattle, have been made sanitary and comfortable by the substitution of movable double-sash windows for the fixed windows; by introducing concrete floors in kitchens, and boarded floors in bedrooms and by the general improvement of the surroundings of the houses, including the removal of the manure pits to a safe distance. From the formation of our Board up to the 31st March, 1909, the expenditure made under the house-improvement schemes amounts to £224,728, as follows:—

Improvement of Houses.

(1) Under the Parish Committee Scheme (for particulars of which see Sixth Annual Report, page 70, and page 104 Thirteenth Report) 13,057 grants were made for the erection or improvement of dwelling-houses, and 13,926 grants were made for the erection or improvement of out-offices, making a total of 26,983 works for the execution of which we made grants amounting to £49,064. (See Appendix XXXVI.)

(2) Under the "house-improvement" schemes, which are applicable only to estates purchased by us, assistance may be obtained for the erection or substantial improvement of dwelling-houses, and for the erection of out-offices, as follows:—

(a.) In the forms of a repayable advance and a free grant for work completed while the estate is in hands on terms set out in the poster (for copy see page 19 of Thirteenth Annual Report). The "advance" is included in the sale price of the holding, and is repaid with the price of the land by half-yearly annuities at the

rate of $3\frac{1}{4}$ per cent. per annum, extending over a period of 68 $\frac{1}{2}$ years. The advances do not, save in exceptional cases, exceed £25, and this amount is repaid by half-yearly payments of 8s. 1 $\frac{1}{2}$ d., payable for 68 $\frac{1}{2}$ years.

Under this scheme the dwellings erected or substantially improved and the out-offices erected number 7,800, and the amount of assistance given in the shape of advances to be repaid and in free grants amounted, up to the 31st March, 1909, to £78,320.

(b.) Assistance by loans for the erection of out-offices and the erection and improvement of dwellings has been given to tenant-purchasers (on terms set out in Thirteenth Annual Report, page 20) on estates sold by the Board to persons who did not carry out the work while the estate was in hands. The loans do not exceed £25, and are repayable in 50 half-yearly instalments. The half-yearly instalment for a loan of £25 is 15s. 1d., payable for 25 years. The total number of dwellings and out-offices built or improved under this scheme up to the 31st March, 1909, is 196, and the amount of money borrowed is £2,694.

The work under the above schemes has been done by the land-holders themselves, subject to the general supervision of our officers. We do not erect buildings except on new holdings provided for migrants on grass lands that we have purchased, and in connection with the striping or re-arrangement of holdings we sometimes build houses, on terms previously arranged with the tenants, in lieu of those it may be necessary to remove, when the old houses are too close together, or are situated amidst insanitary surroundings.

(c.) For migrants and in connection with the re-arrangement of holdings our staff had erected up to the 31st March, 1909, 1,348 dwellings and out-offices at a cost of £99,750.

The following is a summary of the results of the above schemes up to the 31st March, 1909:—

	No. of Works Executed.	Expenditure by Board.
Under Parish Committee Scheme (not repayable),	26,988	£49,064
House Improvement Scheme on Estates in hands (partly repayable),	7,800	78,220
Loans to Tenant-purchasers on Estates previously owned by Board,	196	2,694
Buildings erected by Board's staff for migrants and in re-arrangement of holdings (partly repayable),	1,348	99,750
Total,	36,327	£224,728

II.—SEA FISHERIES.

The general results of the sea fisheries developed by our Board on the western and northern coasts of the scheduled Congested Districts were again satisfactory in the year ending 31st March, 1909, the total earnings of the fishermen at the four principal fisheries having been £59,887. Although this was £4,000 less than the previous year, it was better than the average of the last six years, which was £59,000.

Fisheries—
General
Results.

The four fisheries now referred to are:—

(a.) The spring mackerel fishing on the Galway coast, including the Aran Islands. The earnings in 1908 were £7,012, which was better than the average of the past four years (£6,350), but fell considerably short of the average of the five preceding years, which was £8,000.

(b.) The autumn mackerel fishing on the coasts of Galway and Mayo has been the most fluctuating of all the fisheries on the west coast, its dependence on the American markets being an additional element of uncertainty. The fishermen's earnings last year were only £1,050, as compared with £1,924 in the previous year and £5,200 for the average of the preceding eight years.

(c.) The autumn herring fishing at Downing's Bay, in North Donegal, produced last year £21,450, which was £2,600 below last year's return and £5,000 below the average of the preceding eight years, viz., £26,300.

(d.) The summer herring fishing carried on at about 10 to 30 miles north of Sheephaven, County Donegal, and which was commenced by the Board's boats in 1901, has been most productive, and up to last year showed no unfavourable fluctuations. The estimated earnings were, in 1902, £5,358; in 1903, £10,000; in 1904, £11,000; in 1905, £12,700; in 1906, £24,000; in 1907, £31,623; and in 1908, £30,375. Last year this fishery extended westwards to the sea off Kincasslagh and Burtonport, where the receipts were £4,300; and as far south as Killybegs, where the earnings amounted to £5,400.

1.—SPRING MACKEREL FISHING, 1908.

The spring fishing at the Aran Islands was much more successful in 1908 than the fishing in the previous year, the fishermen's receipts being £1,772 instead of £885. It commenced on 21st April and closed on 18th July, but for several weeks only ten boats were fishing, although Messrs. Smith of Birmingham had made contracts with the crews of 18 boats. They refused to buy from some of these boats, which did not begin in proper time and thus lost the earlier part of the fishing. The weather was generally unfavourable, and many of the boats used short trains of nets,

Aran
Islands.

Fisheries—
Cleggan.
Aran
Islands.

About £400 was earned by 90 persons engaged in curing and marketing. Other particulars will be found in the Appendix at page 52.

The spring mackerel fishing began at Cleggan in the middle of April, and continued until 22nd July. It was not satisfactory, the earnings being only two-thirds of those of the previous year. The stormy weather and the scarcity of fish both contributed to this failure. About 6,000 boxes were despatched fresh and 1,400 barrels were cured. Twenty-five large boats, including four from Achill, and twenty small boats fished. The Board supplied a cargo of ice as in former years, and lost a large percentage of the cost owing to the fishing being late and light. Seventeen buyers attended, but the quality of the fish was inferior and prices never reached a high figure.

Clifden,
Bunowen,
and Doon-
loughan.

There was no fishing at Clifden, as all the boats belonging to that place landed their fish at Doonloughan or Cleggan. At Doonloughan, where only small or open boats are used, the season began on 10th June and lasted until 28th July. Fifteen small boats fished and realized more than £400 from 500 barrels cured, and the people employed in curing earned about £75.

At Bunowen sixteen small boats and one nobby did well, the fishermen earning £620 and the curers £120. 750 barrels of fish were cured.

Roundstone.

The fishing at Roundstone opened on 2nd May and ended on 29th July. It proved to be one of the best for many years, and resulted in 4,167 boxes of fish sold fresh and 1,460 barrels cured; the fishermen earning nearly £2,000 and the local curers about £420.

On one day, the 4th July, over 100,000 mackerel were landed, but only 40,000 of these were taken by one buyer who was on the spot, the rest being left in the hands of the fishermen. Some were thrown overboard and little money was obtained for the remainder of the catch. Of the 40,000 purchased by the merchant, only 31,000 could be cured in the short time available in such hot weather.

2.—AUTUMN MACKEREL FISHING.

Cleggan.

At Cleggan the fishing commenced on 1st August, 1908, and continued until 31st January, 1909, but the results were most disappointing, hardly any fish being taken except during two weeks of November and one week of January. The mackerel were poor, averaging 840 to the barrel, and the prices were about 6s. per hundred. Some fish sold fresh, late in the season, were bought from the fishermen at 12s. per hundred. In all, 615 boxes were sold fresh and 198 barrels were cured, producing together £423.

This fishing was, as usual, carried on only by small boats, of which 26 were working.

At Inishboffin 70 small boats were fishing, and obtained £400 for 502 barrels. Fisheries—
Inishboffin.

There was no fishing at Darby's Point last autumn, and the local boats tried herring fishing in the Killarney district, with little success. Darby's
Point.

The autumn fishing at Doonloughan and Bunowen was carried on by 16 small boats between 1st August and the end of December. Only 98 barrels were cured, and only £73 earned. Doon-
loughan and
Bunowen.

There was a poor fishing at Kilronan, Aran Islands, but as the boats sold their fish at Galway or Spiddal no returns were obtained. Aran
Islands.

At Kilmurvey, Aran, the fishing began on 1st September and lasted until 20th December. For a short time the takes were good, 815 barrels being cured and £580 being earned by thirty-two boats.

3.—SUMMER HERRING FISHING, 1906.

This fishing was commenced at Downing's Bay on 2nd May, 1906, by 50 or 60 Scottish drifters. The Board's boats did not begin until the 15th, as the fishing was very light. An improvement took place on the 20th, and from that date good catches were obtained up to the 6th June, when fishing again became light and closed on the 16th June. The steam drifters, which numbered 78, had a great advantage over the sailing boats, owing to the calm weather, and got most of the earnings. There were 50 Scottish sailing drifters and 48 local boats. The number of men engaged in the whole fleet was about 1,250, of whom 288 were local men; but in addition to these many people were employed in curing, carting, and unloading steamers, and earned about £2,000, while the payments to the fishermen amounted to £22,628. 10,287 barrels were cured, a slight falling off from the previous year's total. The business was much hindered by the works for the extension of the pier being carried out during the fishing. Downing's
Bay.

The quality of the herrings was very good, even superior to that of last year's fish, but the prices were lower, owing to dullness in the foreign markets.

The Insurance Clubs in Scotland demand an extra premium from boats fishing at Downing's Bay, owing to the want of protection from storm. For the same reason the Board have had to ask a double premium, 6 per cent., from loan boats fishing at Downing's Bay, in consequence of the large number of wrecks that have occurred there during the past four years. This higher rate is also charged on boats entering Brandon Bay, Co. Kerry.

The summer herring fishing opened at Kincasslagh on 2nd May and closed on 20th June. Some Scottish drifters were working, but the fish were too far from shore for the local boats to do well in very calm weather. In all only 2,750 half-barrels Kincasslagh.

Fisheries—
Kincasslagh.

were cured, the fishermen's earnings being under £2,000, and those of the curers on shore were about £160. Forty-one large boats, including steam and sailing drifters, 17 local boats, and 12 yawls, fished.

Killybegs.

At Killybegs the season opened on 7th April, 1908, and closed on 15th June. During the earlier part of the time especially the weather was bad. About 1,024 crans of mackerel were caught with the herrings in May. 3,700 boxes of herrings were sold fresh, and 2,544 barrels were cured. Fifty large boats fished, many of them having come from the east coast of Ireland.

When barrels and salt became scarce the S.S. "Granuaile" brought supplies from Burtonport to Teelin and Killybegs.

Teelin.

The fishing at Teelin lasted from April to the end of June, when the boats were laid up. Only 120 boxes of fresh fish and 584 barrels of cured herrings were obtained, and the earnings of the fishermen were under £570; which was a poor return for 22 large boats. Six buyers attended.

Burtonport.

At Burtonport the fishing began on 15th May and ended about 6th June. The fish caught locally were of good quality, but a large percentage of the fish sold at this station were caught by steam drifters at a considerable distance from land, and these were small and of poor quality. The 160 crans landed realized £400. Only ten small boats were fishing.

4.—AUTUMN HERRING FISHING, 1908.

Downing's
Bay.

The fishing began at Downing's Bay on 20th August, 1908, but continued light during August and September. Towards the end of December large takes were made both by the Board's boats and by others, including some steam drifters. The weather continued unsettled in January and interfered very much with the work of the sailing fleet, but the fishing was good until the beginning of February. It closed on the 18th of that month.

There were 106 large and four small boats fishing, and the total catch was 11,435 barrels cured and 180 boxes sold fresh.

The earnings of the fishermen amounted to £10,500, and £2,400 was earned by the curers on shore.

Kincasslagh.

Nothing was done at Kincasslagh until 1st October, the weather being unsettled, but subsequently and up to the first week in February, a good fishing was obtained, especially by the steam drifters, which were able to go to a considerable distance from land.

About 4,000 barrels of cured fish and 200 boxes fresh were marketed, and the fishermen earned about £3,600. Twenty-five large and sixteen small boats fished.

The curing employed nearly 140 people on shore, and their earnings were estimated at £430.

The fishing at Burtonport was carried on intermittently from the middle of September to the end of January. The rough weather prevented the small boats going to sea during a great part of this time, and only 650 barrels were cured and 70 boxes sold fresh, producing less than £700 for the fishermen. Four large boats and 80 small boats fished.

Fisheries—
Burtonport.

At Magheracarty and Falcarragh the autumn fishing was also poor, the earnings of 80 small boats between 20th November and the end of January amounting to only £900.

Magheracarty
and
Falcarragh.

At Magheragallon and Bunbeg the results were very bad indeed, only £200 being earned by six large and 70 or 80 small boats.

There was practically no fishing at Rosbeg and Loughros. The fishermen asserted that the absence of fish was caused by the trawlers and steam drifters. In past years this was an important station, nearly £9,000 having been earned in 1906 and £2,000 in 1907.

Rosbeg.

The autumn herring fishing at Killybegs commenced in the middle of September and closed at the end of December. A large number of boats were working, but the unsettled weather caused much interruption. The quality of the fish and consequently the prices varied considerably during the season.

Killybegs.

About 2,200 boxes were sold fresh and 2,700 barrels were cured, bringing £5,400 to the fishermen and £250 to the curers employed ashore.

In October there were 35 large boats fishing.

The fishing at Darby's Point, Achill Island, was a failure, and the local boats went to Leenane.

Darby's
Point.

At Leenane four large and 16 small boats fished, and about 120,000 fish were landed between 10th September and 10th December. The large boats only fished a short time, as there were constant disputes between the drift and stake-net fishermen. The earnings were about £245. At Tully 23 canoes fished.

Leenane and
Tully.

At Clare Island there was very little fishing, only a few barrels being cured between 20th September and 20th October.

Clare
Island.

5.—WINTER LONG LINE FISHING.

The long line fishing from the South and Middle Islands of Aran was carried on for about four months, ending in the second week of April, and was fairly successful; 1,440 boxes of white-fish were sold fresh and a few barrels cured, producing earnings of nearly £750. Twenty-nine small boats and canoes fished.

Aran
Islands.

At Kilronan and Kilmurvey the fishing began in January. Three nobbies fished for a few nights, but the bulk of the work was done in canoes. Cod, ling, halibut, turbot and conger were all caught, but fish were rather scarce owing, as the fishermen believed, to the visits of steam trawlers.

Fisheries—
North
Mayo.

At Portacloy and Rinroe the fishing lasted from the middle of January to the beginning of May, and was good during two weeks of January and the whole of February. Thirteen small boats obtained 4,500 cod at Portacloy during these six weeks and sold them locally. About 900 cod were landed at Rinroe. The total earnings were under £60.

No returns were received from Porturlin or Belderrig.

INSTRUCTION IN FISHING.

Co. Donegal.

Twenty-two Instructors were employed in Co. Donegal during the summer herring fishing, for about six weeks; but in addition to this employment, twelve Instructors were engaged in net-mending and preparing the boats for sea during about ten weeks before the fishing and for six weeks after it.

In the autumn, when the fishing at various places lasted from 13 to 22 weeks, twenty-four Instructors were employed.

Mayo and
Galway.

During the spring mackerel season thirteen Instructors were employed from 11 to 20 weeks; five in loan boats and eight in share boats. Another was employed at Aran thirteen weeks, and one at Clare Island five weeks.

Cork and
Kerry.

No instruction was given in Cork or Kerry during the year 1908-9.

The total cost of instruction for the year was £2,407 14s. 1d., of which £375 13s. 6d. was re-paid by the fishermen.

INSTRUCTION IN HERRING-CURING.

Cork and
Kerry.

It was stated in our last Report that, in response to applications from the South of Ireland, we sent a fish-curer to give instruction at several places in County Cork and County Kerry. The Instructor visited Cahirciveen, Derrynane, Castletown Bere, Kilmacalogue, Ballycrovane, Bantry, Garinish, Ballydonegan, West Cove, Valentia, Dingle, Castlegregory, Brandon, Sneem, Portmagee, Ardgroom, and Dursey. Practical instruction was given in the cleaning, curing, and packing of herrings, and information was afforded to local fishermen and dealers in regard to the different markets and their requirements.

We also chartered an Arklow motor boat, the "Ovoca," to fish on the south coast during July and August in connection with the instruction in curing. Some of the herrings cured and packed under these directions were sold in Hamburg at 55 marks per barrel.

BOAT BUILDING.

Boat
Building.

During the year eight Zulu boats were built for the Board, two of them being 36 feet keel, the rest 37 feet on the keel. Four of these were built at the Industrial School at Killybegs at prices from £225 to £227 10s. 0d., complete and ready for sea. Two boats were purchased at Sandhaven, N.B., and two at Banff, N.B., for £208 and £210; but to this must be added the cost of delivery in Ireland, about £16 10s. 0d. each, besides special insurance for the voyage from Scotland. A list of these boats is given in Appendix XXI.

A memorandum on Motor Fishing Boats by the Rev. W. S. Green is printed in Appendix No. XXII. Arrangements are now being made for the building of a boat of this class at the Industrial School, Killybegs. Boat Building.

On the 22nd November, 1908, six of the Board's share boats and one loan boat were wrecked at Downing's, all being a total loss. The wind on the 22nd gradually increased to a hurricane from the N.W. with a very heavy sea, and during the night the boats got adrift and went ashore. A part of their gear and nets was saved. One boat was lost at Mulroy on February 2nd, having run on the rocks near Mulroy Bar, and sank in eight fathoms of water. Her nets were saved. Two boats were sunk on 25th November at Downing's Bay, but one was saved and repaired, the other being a total loss. Wreck of Boats at Downing's.

FISHERY LOANS.

The decline of the mackerel fishery on the coast of South Connemara, which was referred to in several of our Reports, has led to the closing of some further loan accounts of borrowers who had no reasonable prospect of repaying their debt to the Board, and the following cases must be added to the list given in our last Report:— Fishing Loans.

Name of Boat.	Total Loans made.	Date of the First Loan.	District in which Owner Resided.	Amount Written Off.
	£ s. d.			£ s. d.
Enterprise ..	524 9 11	31 Aug., 1902	Kilreman ..	202 9 7

	1,984 10 4			886 17 0

III.—INDUSTRIES.

LACE AND CROCHET.

As was anticipated, the acute trade depression of 1908 materially affected the demand for lace and crochet during the past year. An exceptional and world-wide shrinkage in the demand for every description of manufactured goods caused a resort to short-time in practically every staple industry, and it could not be expected that the lace trade would not also be affected. It is, therefore, highly satisfactory to be able to report that the turnover at the Board's lace classes, although smaller than for the previous year, showed a less percentage of falling off than might have been anticipated, and less than that which was experienced in the market for other staple manufactured articles which may be classed as necessities. The sales from these lace classes, of articles which are

practically luxuries, amounted to as much as £23,100 for the year, as compared with the maximum figure for the previous year of £23,300. The reduction in price alone would account for this difference.

Lace Classes.

In connection with lace, we desire again to take the opportunity to impress on the workers that it is essential to promptly follow the requirements of the market, especially as regards design. Had the workers been willing to give up old patterns, and immediately produce new ones for which a demand had arisen, their earnings would, probably, have exceeded those for the previous year. It cannot be too strongly impressed on the workers that business gravitates to those centres where adaptability to the requirements of the market is most quickly shown, and that the price of lace is determined, not by what workers are accustomed to earn, but by what other workers, elsewhere, will take for producing the same articles.

HOMESPUNS.

Homespun.

Notwithstanding the depression of trade during 1908, which so profoundly affected the cotton, woollen, linen, and jute industries, there was a brisk demand for homespun cloth at the principal centres of production. At Ardara and Carrick, in County Donegal, the markets were well attended by buyers, and the production and sales exceeded those for any previous year. Some 3,366 webs were sold at these markets, the estimated value being over £15,000. It is fortunate that just at the time when other textile trades were extremely depressed, and prices low and unremunerative, a brisk demand set in for caps made from homespun cloth. This additional opening for homespuns was sufficient to stimulate the market, and all the producers were, in consequence, kept fully employed. Another result has been an increased number of applications for improved looms and for weaving instruction.

Were the producers of homespuns in South Donegal willing to adopt the recommendations previously given by the Board, and to make a rather heavier cloth, putting more twist into the yarn, and thus make a better wearing material, there is no doubt they would be repaid for the additional labour involved, besides placing the industry on a firmer basis by the production of an article likely to remain in constant demand.

The existence of the homespun industry is threatened by a growing disposition to use machine-spun yarn in warp or weft, and while efforts have been made to prevent dealers fraudulently selling machine-spun and machine-woven goods to persons who buy them as genuine Donegal homespuns, the weavers and spinners of the district should combine to prevent goods which cannot correctly be called homespuns being produced and sold as such in the district.

Weaving instruction has been given during the year at Achill, County Mayo; Glengarriffe, County Cork; and Gortahork, County Donegal.

DOMESTIC TRAINING CLASSES.

Instruction in cookery, laundry, and domestic economy has been given at the following centres during the year:—
 Ardarae, Attymachugh, Shraheen, Pontoon, Knockmore, Carnacon, Letterbrick, Ballycroy, Geesala, and Ballintubber (County Mayo); Dunfanaghy, Creeslough, Lettermacaward, Derrybeg, Glensely, and Culfadda (County Donegal); Portmagee, Ballinskelligs, Kinneigh, and Newtownsandes (County Kerry); and at Drimna and Kilmactigue, County Sligo.

Domestic Economy.

From practically all these classes the Board have received independent testimony as to the great practical value of the instruction, and it is increasingly evident that the full four months' course of instruction enables the pupils to derive advantage which could not be obtained from a less thorough course carried on for a shorter period.

The course of instruction is made as practical as possible so as to have an influence on the pupils' homes, and if the girls subsequently go out to domestic service, as many of them do, the instruction given is such as to render them much better qualified for their work.

The Board have continued pay for a six months' course of residential instruction in domestic economy, for pupils coming from the congested districts, at the Killarney School of Housewifery, and the pupils from this school have, as hitherto, on completion of the course of instruction, been able to procure good situations as domestic servants.

MANUAL INSTRUCTION CLASSES.

Courses of manual instruction have been given at nine centres during the year. The pupils at these classes have turned out a large amount of serviceable articles suitable to their own requirements, such as doors, windows, gates, wheelbarrows, presses, cupboards, chests, tables, &c. In this connection the work done at the carpentry class at Redcastle, County Donegal, and the steady attendance of the pupils there, deserve special mention.

Carpentry Classes.

Carpentry classes were held during the year at the under-noted centres, namely:—Redcastle, Carrowmore, Culfadda, and Gortahork, County Donegal; Keenagh, County Mayo; Cashel, County Galway; Cloonscool and Kilmactigue, County Sligo; and Glencar, County Kerry.

MACHINE KNITTING.

Owing to the depression in trade the Board have discontinued giving machine knitting instruction till some improvement takes place. The only classes held during the year were at Breenagh and Bunbeg, County Donegal.

Knitting.

LACE AND CROCHET CLASSES.

Lace and
Crochet
Classes.

Lace and crochet classes have been held during the year at the following centres, namely:—Aranmore Island, Ardara, Bruckless, Carrigart, Culfadda, Dungloe, Fintown, Glenvar, Loughmilt, Massinass, and Termon (County Donegal); Carna, Clonbur, Cornamona, Costelloe, Killeauey, South Aran, Leenane, Oughterard, Roscahill, Rossmuck, Roundstone, and Spiddal (County Galway); Achill Sound, Attymass, Ballina, Ballycroy, Bangor Erris, Belmullet, Carratigue, Clare Island, Corcolough, Dereen, Dereendaffderg, Derrypark, Doohoma, Foxpoint, Glenamoy, Kiel, Killogeary, Kiltimagh, Letterbrick, Porturlin, Pullathomas, Shanahoe, Shraah, and Tourmakeady (County Mayo); Ballintrillick, Benada, Cliffoney, Kilmactigue, and Magherow (County Sligo); Killarga and Rossinver (County Leitrim); Ballydehob, Baltimore, Bere Island, Cape Clear Island, Castle-townbere, Durrus, Glengarriffe, Kilorohane, Schull, and Sherkin Island (County Cork); Caherdaniel, Castlecove, Glenbeigh, Shanacuan, and Waterville (County Kerry).

EMBROIDERY AND DRAWN WORK CLASSES.

Embroidery classes have been held at Ardara, Gartan, and Knockletragh, County Donegal; and at Derrew, Partry, Treemaur, and Shraah, County Mayo.

LACE CURTAIN CLASSES.

Lace Curtain classes have been held at Carraroe, Kilkerrin, Lettermore, and Lettermullen, County Galway.

IV.—ENGINEERING WORKS AND PARISH COMMITTEES.

Engineering
Works.

In addition to the improvement works carried out on our estates, marine and inland works are executed for us by the engineering staff employed jointly by the Department of Agriculture and ourselves, and by County Councils with the assistance of grants made by us. Other works were constructed by the Commissioners of Public Works under the Marine Works Act of 1902, and to the cost of these we contributed, as in previous cases, ten per cent. of the total estimate. Lists of all these works will be found in Appendix No. XXIII.

The net expenditure during the past year amounted to £4,559, divided as follows:—

Marine Works, Piers, Slips, &c.,	£
Roads, Bridges, Drainage Works, &c., carried out by the Board,	2,741
Roads, Bridges, &c., carried out by County Authorities, aided by contributions from the Board amounting to	129
	1,689
Total,	£4,559

The details of this expenditure will be found in Appendix No. XXIII.

The marine works under the Act of 1902, to which we contributed in the year 1908-9, were:—

Engineering
Works.

Cleggan Pier, Co. Galway, ...	£500.
Reenard Pier, Co. Kerry, ...	£250.

The works constructed by the joint engineering staff, entirely at our own cost, were:—a landing-slip at Pollanamuck, Co. Galway; improvements at Roads Slip, Co. Kerry; landing slips at Tracallig and Tracloosh, Co. Cork; a quay at Goleen, Co. Cork; and a causeway connecting two portions of Hare Island, Co. Cork. In addition to these works further expenditure was made on the new piers at Adrigole and Glengarriff, Co. Cork, and £328 was spent on dredging the approaches to the latter work.

PARISH COMMITTEES.

This scheme of small grants to small occupiers to encourage and assist them in the improvement of their houses, cattle sheds, and holdings, has been referred to above, at page 11, under the head of "House improvements." It was commenced in 1897 by the grant of £1,520 amongst twelve of the most congested parishes in Co. Mayo, and in 1907-8 had been extended to one hundred and five parishes in Counaught, thirty-four in Co. Donegal, and twenty-six in Cork and Kerry, the grants paid in that year amounting to £10,698. (See Appendix No. XXV.)

Parish
Committees.

A large number of witnesses before the Royal Commission on Congestion bore testimony to the remarkable improvement effected in the homes of the people by means of these grants. A more hopeful and energetic spirit had been infused into the minds of thousands of the poorest class of small tenants, most of whom had for many generations kept their cattle in their dwellings and lived amidst most insanitary surroundings, making no effort to adopt a higher standard of living until they were prompted to do so by the instruction provided under this scheme and by the offer of some assistance in meeting the cost of the materials or other necessary outlay. Between 1900 and 1908 no less than 7,998 dwellinghouses were built or substantially improved, and 10,476 out-offices for cattle were erected or enlarged.

The statistics given in Appendix No. XXXVI. show that the total estimated value of the works carried out under this scheme was £372,648, and that the grants made by us in cash amounted to £58,187, equivalent to about one-fifth of the total cost. The beneficiaries under the scheme have, therefore, themselves contributed £214,456 in labour and materials. The plan by which the Board's object of securing the best representatives in the localities for the Committees varied in different parts of the Board's area.

No grants were made to occupiers whose land and houses together exceeded a Poor-law valuation of £7.

We had to discontinue this scheme after 31st March, 1908, owing to the want of funds for the development of the estates we had purchased, and the payments of £1,985 made in the past year were balances of grants sanctioned in previous years.

V.—MISCELLANEOUS.

1. RAIFFEISEN BANKS AND AGRICULTURAL CREDIT.

Raiffeisen
Banks
and the
question of
Agricultural
credit.

On the 31st March last there were sixty-four Raiffeisen Agricultural Banks in operation in the Congested Districts, and the statistics given in Appendix No. XXIV. show the amount of business transacted in the past year by the fifty-six banks from which returns up to 31st December, 1908, have been obtained. Other banks had been organised, but, for various reasons, had not yet transacted any business. The total amount which we have set apart for loans to these banks remains at £6,000 and £5,925, advanced from this fund, was in the hands of sixty-five banks on 31st March last. £1,345, out of loans made from time to time to various banks, has been refunded and lent to others. In only one case has a loan (amounting to £50), been subsequently re-issued to a bank which had repaid to us any portion of the sum originally lent.

The record for the year is, on the whole, satisfactory. Many of the banks are able to draw a larger proportion of the funds they require from the Joint Stock Banks and from local depositors, the total capital derived from these sources having increased during the year from £8,643 to £10,088. The steady growth of the Reserve Funds, which now amount to £1,143 for forty-five banks, is again a noticeable feature in the year's statistics. On the other hand, as many as eight of them were not, at the date of printing this report, in a position to furnish a statement of their accounts for the year ending 31st December last. Although the accounts are kept and the correspondence of all these banks is carried on by honorary officers the failure to observe important rules, framed for the management of the business, is to be regretted.

The issue of loans to migrants for procuring live stock and agricultural implements has hitherto been too heavy a transaction for these banks to undertake, and it will altogether harmonise with the views of the Board if, hereafter, in the course of their work, it is found that the Board can substitute the system of agricultural banks for the one they have hitherto pursued of direct financial loans.

2. MISCELLANEOUS.

Subsidies
to Steamer
Services.

The subsidies to the Galway Bay Steamboat Company for the steamer service to the Aran Islands and to the Bantry Bay Steamboat Company for calling at Glengariff and Adrigole, were continued during the past year. A small payment was also made as a contribution to the extra cost of additional trips of the S.S. "Tartar," between Sligo and North Mayo Stations, to assist the salmon fishery.

S.S. "Gran-
ville."

In November, 1908, our steamer the "Granville" brought one cargo of Swedish barrel materials from Fraserburgh, the quantities being 157,000 feet of staves, 43,000 feet of headings, and 26½ tons of iron hoops. The greater portion of these materials were

sold to coopers in Cork and Kerry, the balance being retained for our own cooperages at Burtonport and Downing's Bay. Some firms, doing a large business in the south, applied to us for all the materials they required, but as we did not think it necessary to give assistance in such cases we supplied only a portion of the total quantity applied for by the merchants and coopers.

S.S. "Granallie."

We gave in our last Report a list of the houses which we have built for Lady Dudley's nurses in places where suitable accommodation could not be obtained. No additions to this list have since been made.

Lady Dudley's Nursing Fund.

At the request of the Honourable Albinia Broderick we sold to her 13½ acres of land, on the Burns-Hartopp estate, for £40, the price we had paid for the land, which was of poor quality, and Miss Broderick is about to erect on this site a cottage hospital for the benefit of the poor in the district.

West-Cove Cottage Hospital.

During the past year we paid £161 12s. 10d. in respect of guarantees we had entered into for the extension of the telegraph system in the Congested Districts. Deducting those guarantees which have lapsed by the termination of the periods for which they were given, the balance we were still liable for on 31st March last was £413 6s. 4d. per annum.

Telegraph Extensions.

So far as we have been able to obtain information, the earnings along the Galway coast from the kelp-burning industry appear to have been well maintained during the past year. On the Aran Islands about 265 tons were prepared, and on the South Connemara Coast about 1,100 tons, the price varying from £3 5s. to £4. Only 30 tons were sold at Clare Island and none at Inish-boffin. The kelp trade on the coast of Donegal is of considerable importance, but no statistics have been obtained to show the extent of last year's operations.

Kelp-burning.

We have been, as in many previous years, under great obligations to the Inspector-General of the Royal Irish Constabulary and to the officers and members of the Force, and also to the officers and men of the Coast Guard Service, for very valuable assistance given in connection with fishery and other operations.

Assistance from Police and Coast Guards.

The accounts of receipts and payments in the year ending 31st March last, as furnished to the Comptroller and Auditor-General, with full details under each head, and statements of the loans issued, are submitted in the Appendix of this Report.

Annual Accounts.

3. MEMBERSHIP OF THE BOARD.

At the meeting of our Board on the 10th December last, the following resolution was adopted:—

Membership of Board.

"The members of the Congested Districts Board deeply regret the death of their esteemed colleague, Mr. Charles Kennedy. He was a member of the Board from its inception, and amidst the occupations of a busy life he spared neither time nor attention in endeavouring to improve the condition of the people in the congested districts."

Membership
of Board.

Mr. Kennedy died, after a short illness, on the 7th December last. Since 1893 he had acted as one of the two Trustees for the Board under the Congested Districts Board Act of that year. The Rev. William Spotswood Green, C.B., was appointed in his place in December last, by resolution of the Board.

By Warrants dated 23rd June, 1909, the Right Hon. Sir David Harrel, K.C.B., and Mr. William Lawson Micks have been appointed members of the Board, the former as a temporary member to fill the vacancy caused by the resignation of the Right Hon. Arthur James Balfour, M.P., and the latter as a permanent member in place of the late Mr. Charles Kennedy.

We have the honour to be

Your Excellency's faithful Servants,

AUGUSTINE BIRRELL,

J. B. DOUGHERTY,

W. P. GEOGHEGAN,

W. L. MICKS,

APPENDIX XXII.

MOTOR FISHING BOATS.

MEMORANDUM BY THE REV. W. SPOTSWOOD GREEN, C.B.

For some years past the fishing on the Donegal coast has been falling more and more into the hands of steam drifters that come from England and Scotland. These boats meet the herring at sea, and sailing boats are at such a disadvantage in the competition that the crews show a tendency to lose heart in the fishing. It will be remembered that in 1907 a Gola Island crew applied to the Board for a steam drifter, and that we got one built; but when the crew that first applied, and a second crew to which the steamer was offered, came to consider the great responsibility involved, they refused to accept her, and the boat was sold on the stocks.

Since then several crews have applied for large sailing boats, with auxiliary motor engines, and at last Board meeting I was asked to report on our experience in the fishery work of the Department concerning motor fishing boats.

It is now five years since the Fishery Board for Scotland appointed an expert commissioner to investigate and report on motor engines, and having studied the engines at home and abroad, he came to the conclusion that the Danish paraffin engine, known as the "Dan," was the most suitable for fishing craft. The Fishery Board then got a full-sized herring boat built, fitted with a "Dan" engine, and capstan driven by the same engine. The capstan failed to work, and a steam engine had to be installed to drive it. The boat also was too slow, and it became evident that the experiment was a failure. Some years elapsed before the matter was again taken up seriously, but during that period the manufacturers of engines were improving the machinery.

Knowing that motor boats were coming into all fishings in Norway, Denmark, and America, I was fortunate, early in 1907, in meeting Dr. Hjort, the Inspector of Norwegian Fisheries, in London, and discussing the matter with him. They had then about 500 motor fishing boats in Norway, and though many were of small size, it was evident that the motor had come to stay. The engines favoured in Norway were the "Dan," made in Copenhagen, and the "Alpha," in Christiania. Both of these types of engine are fitted with "tube ignition," that is to say, a bulb is merely made red hot by a blow-lamp, and once the bulb is hot the lamp is extinguished, the firing of the charge keeps the bulb hot, and the engine works with no more attention. Almost all other marine engines are driven by magnetic ignition. The magneto is an extra piece of machinery to look after; the sparking often fails to work in unskilled hands, and altogether an engine depending on magnetic ignition is more liable to go wrong in the hands of a fisherman. We now thought the time had come when the Department might take the matter in hands; but in order to learn as much as possible of up-to-date fishing-boat engines, we sent Mr. G. P. Farran, of our Scientific Branch, to the Motor Boat Exhibition, in Kiel, in 1907, to report.

We had already issued some fishery loans for motor engines for open boats, but in 1907 we placed an order with Messrs. J. Tyrrell & Sons, of Arklow, to build a large motor fishing-boat, ketch-rigged. Length 48 feet 4 inches (between perpendiculars); beam, 14 feet 4 inches; and depth, 7 feet 2 inches; fitted a 20 horse-power 2-cylinder "Dan" engine, and feathering two-bladed propeller. She has a winch, driven by the engine, on a system that had been much improved since the time of the Scotch experiment above referred to. She cost, exclusive of fishing gear, £847. The fuel consumption comes to 1½ gallons of paraffin and ½ pint of lubricating oil per hour, and she travels in smooth water at six knots per hour. The boat was named the "Ovoca," and now that she has been a year in commission, it is pleasant to have to say that the engine

and winch have worked with complete satisfaction. Twice she has been all round Ireland. At the Killybegs herring fishing of the spring of 1908 she proved her sea-worthiness by being able to keep the sea and fish in weather when all other craft, including steam drifters, had to return to port without shooting their nets. She was given on loan to an Arklow crew, and in their first eight months' working, up to January 1st of the present year, she had earned £600, and at seine fishing she has earned a good deal since; but the Killybegs fishing of this year proved a failure, as herrings did not come to that part of the coast at all. She does a good deal of her work under sails alone.

Her fishing outfit is an important feature, and as it indicates a direction in which I think there is a great opening for development, I must describe it in detail.

The "Ovoca" was fitted with herring nets, long lines, and an otter trawl. We counted on the herring fishing being the main source of earning, but the other gear was provided to fill up the otherwise blank seasons and keep her employed. The Danish fisherman instructor, whom we engaged to teach the crew how to work the engine, suggested that good work could be done with one of the light seines used in his own country. We immediately sent for one of these Danish seines. Before he left our employment he demonstrated its use, and the result has been that the crew of the "Ovoca" have made such good earnings with the seine that they look on line fishing or trawling as merely a waste of time. The Danish seine has also other advantages; while being a most effective method of catching ground fish, it has none of the objections that apply to trawling. It is carried out from the boat at anchor, and so is not drawn blindly, as a trawl, over other men's lines, or other fishing gear; and it is less injurious to small fish that are not wanted for market. It now seems that a motor boat fitted with herring nets and Danish seines can fill up all seasons of the year with profit. A Danish seine costs about £8, and the ropes for hauling it £15. It is needless to say that other crews have been jealous of the fishing of the "Ovoca." Some have asked us to prohibit her; others have asked to be supplied with similar craft. We are now having three boats, smaller than the "Ovoca," built, at a cost of from £450 to £600, but fitted for the same classes of fishing.

I think that for the Downgal fishing the larger size would be best, and that perfectly efficient boats can be obtained for from £600 to £800, fitted as above described, and sure to be profitable if they fall into the right hands.

About two months' instruction in working the engine we believe to be quite sufficient for the average fisherman in the larger class of boat, and much less in smaller ones.

A large number of Scottish herring boats are now getting motor engines installed; the "Gardner" (paraffin) engine is the one most in favour. It is driven by magnetic ignition, and needs a moderate supply of fresh water, and consequently is more complicated than the "Dan." We have, however, decided to try the "Gardner" in one of the boats we are now having built. She will be fitted with twin capstans for hauling nets of my own design.

The "Gardner Co." have quoted us a 15 h.p. engine at £180, whereas a "Dan" of 16 h.p. costs £245; in each case with propellers, tanks, etc., complete. This difference of cost is so serious, particularly in the larger engines, that, though nothing known can surpass the "Dan" engine, we must have regard to the fishermen's pocket.

There are, of course, a great many types of engine in the market. An American engine, called the "Wolverine," is specially adapted for fishing boats, and has recently been adopted by the Danish Government for their police launches.

For small open boats there is a still greater variety of types of engine. The "Belfast Barker" is a very popular little engine in Ireland; and we have just placed an order with Mr. Kelly, of Portrush, to build an open twin-screw motor boat, 30 feet by 9 feet by 4 feet, with two "Barker" engines, for £180.

W. S. GREEN.

APPENDIX XXVI.

ORDER IN COUNCIL UNDER ACT OF 1901.

LANDS PURCHASED BY THE CONGESTED DISTRICTS BOARD
IN NON-CONGESTED DISTRICTS.

By the Lords Justices and Privy Council in Ireland.

S. Walker, C.

Whereas by Section 3 of the Congested Districts Board (Ireland) Act, 1901 (hereinafter called the Act of 1901), it is enacted that where the Congested Districts Board (hereinafter called the Board) have, whether before or after the passing of the Act of 1901, purchased land elsewhere than in a Congested Districts County, We may if We think fit, on the report of the Board, by Order in Council declare that, for the purposes of the section in recital, the land shall be treated as part of such Congested Districts County as We may determine, and the Board shall thereupon have with respect to that land all the powers conferred on them by the Congested Districts Board (Ireland) Acts as amended by the Act of 1901. And whereas the Board, after the passing of the Act of 1901, purchased the lands the particulars of which are set out in the Schedule to this Order, which lands are not situate in any Congested Districts County. And whereas the Board, by letter dated the 18th day of July, 1908, under the hand of Frank W. D. Mitchell, their Secretary, reported that they had purchased the said lands, and requested that We might be pleased to declare by Order in Council that under the provisions of Section 3 of the Act of 1901 the said lands should be scheduled as congested districts and treated as part of the Congested Districts Counties for the benefit of which they were purchased. And whereas the names of the respective Congested Districts Counties for the benefit of which such lands were respectively purchased are set opposite the names of such lands respectively in the Schedule to this Order. And whereas We have determined that such lands respectively shall, for the purposes of Section 3 of the Act of 1901, be treated as part of the respective Congested Districts Counties the names of which are in the same Schedule set opposite the names of such lands respectively, and We think fit to make the following Order:—

Now We, the Lord Justices-General and General Governors of Ireland, by and with the advice of His Majesty's Privy Council in Ireland, in pursuance and exercise of the powers vested in Us by the Act of 1901, and of every other power enabling Us in this behalf, do hereby order and declare as follows, that is to say:

(1.) For the purposes of Section 3 of the Act of 1901 the lands, the particulars of which are specified in the Schedule to this Order, shall respectively be treated as part of the respective Congested Districts Counties, the respective names of which are in the said Schedule set opposite the names of the said lands respectively.

(2.) This Order may be cited as The Congested Districts Board (Ireland) (Outside Lands) Order, 1908.

Given at the Council Chamber, Dublin Castle, the
7th day of September, 1908.

D. HARREL.

PATRICK COLL.

RICHARD R. CHERRY, A.-G.

Total, "New Act"	9,515	1,690,506	1,794,811	1,120	231,915	963	180,481	2,118
Total, all Acts,	15,726	3,252,328	2,451,381	7,307	844,516	1,156	195,300	8,466

* These figures include the prices paid for sundry Tenant-Purchasers' Interest acquired by the Board. The prices are made up by adding the Redemption Value of the Annuity to the price of the Tenant-Purchasers' Interest. The total is taken as the price of the fee of these holdings.

† This figure includes an Estimate of £265 as cost of redemption of Head-Rent on Kilsniff Estate, still being paid by Board.

‡ This figure includes a sum of £3,539 for the purchase of two large tenancy interests on the Waldron Estate acquired at the same time as the Rest of it. This amount is included in the purchase-price because the lands acquired from these tenants were at once recorded as "untransferred," and the price of the Estate must include the amount it cost Board to obtain the occupants' interests.

§ This figure includes an amount of £380 paid for Tenants' Interest acquired prior to purchase of fee of Moyanna Farm.

¶ This figure includes an amount of £2,300 paid for Tenants' Interest acquired prior to purchase of fee on M. J. Baldo (II.) Estate.

|| This figure includes an amount of £40s paid for Tenants' Interest acquired prior to purchase of fee on Brownville Estate.

APPENDIX XXXVI.

SUMMARY OF ALL OPERATIONS UNDER THE PARISH COMBUSTION SCHEME, 1907-1908.

Year	Number of Parishes under Scheme	Totals of Work carried Out.
